

### Architectural Glass Walls

Architecture and design play an important role in planning a space, and glass walls provide an “open environment” with beautiful aesthetics while controlling sound and privacy.

- ¼”, ⅜” or ½” thick tempered glass as specified
- All-aluminum components including hinged or sliding doors, mullions, rails, and sills
- Design options include curves, erasable white writing walls, decorative glass, and applied films

Full height glass walls with decorative film and double sliding doors.

<b>COMPONENTS</b>
<b>CEILING TRACK</b> Extruded Aluminum. Satin anodized or standard paint finishes.
<b>FLOATING SILL</b> Extruded Aluminum. Satin anodized or standard paint finishes.
<b>VERTICAL &amp; HORIZONTAL COMPONENTS</b> Extruded Aluminum. Satin anodized or standard paint finishes.
<b>DOORS &amp; HARDWARE</b> Choose from hinged or sliding door products in aluminum, hardwood, paint grade, or plastic laminate, including prefinished architectural doors. Door hardware to match building standard or as specified.
<b>GLASS &amp; GLAZING</b> Extruded Aluminum components engineered for ¼”, ⅜”, or ½” tempered glass. Overhead bracing and support for architectural butt joint glass to be engineered and constructed by others. All glass supplied by E2 Walls shall be tempered glass and each piece will display the required label.
<b>Notes:</b> For detailed technical drawings, specifications, and assembling information, contact E2 Walls customer service.

Full height glass walls with sliding single door.

Conference room glass wall with solid wood door.
