

WALLS THAT MOVE AND EVOLVE WITH YOUR BUSINESS  
MOVABLE, ADAPTABLE, AFFORDABLE WALL SYSTEMS

**e2w**alls  
Permanent Walls That Move®

The best spaces found in nature are adaptable, strong, sustainable and precise; they are also efficient and environmentally friendly. That's the inspiration behind E2 Walls. We manufacture, install and service movable wall systems that are so flexible and durable, they give you total freedom to reconfigure workspaces to meet your changing business needs. Plus, reusing instead of rebuilding your walls is good for the planet, not to mention your bottom line. Whether it's 10' or 10,000' of wall, we'll grow with you.

## Movable wall systems from E2 Walls

E2 Walls™ movable wall systems is the perfect solution for every area of your office — from executive and general offices to conference rooms, training facilities, storage areas and more. Plus, our full-height wall systems can be easily reconfigured as your business needs change, so they are an economical alternative to gutting and replacing fixed drywall construction.

Our walls are not only durable but beautiful, with a wide array of vinyl, fabric or a custom finish. You can also choose full-height, chair rail and clerestory glass walls, plus doors, glass sidelights and hardware finished to your specifications.

Our quality extends beyond our materials. Professional teams from E2 Walls install and reconfigure our wall systems quickly, cleanly, safely and precisely.

## Your *green* partner from Day One

The very nature of what we do is environmentally friendly since it is far greener to reuse our wall systems than tear out and discard drywall .

With our green design and construction process, our wall systems can help you qualify for LEED certification.

Black trim on these offices was selected to match the existing ceiling grid.

*“E2 Walls is an excellent fit for us company wide.*

*Even at remote locations outside of the Southeast, the installation has been seamless. It's a great comfort to know the crew and staff is the same wherever we go.”*

— Connie Bender,  
Senior Director

Our architectural glass wall features a curved design, decorative films and clear anodized aluminum components.

*“The whole process was easy, and we didn’t need any special tools or knowledge. We just sent E2 Walls our drawings, and they turned around the quote quickly and came out prior to fabrication to verify the conditions.”*

*— Briehn Wildman, Project Manager and Interior Designer*

*“We have raised floors, and the dimensions are different from one floor to the next. E2 Walls made the adjustments and installed our system without extra expense.”*

*— Bruce Ludke, Manager of Building Maintenance*

*“When someone in my company comes to me with an office space request, E2 Walls makes me look good because I can be more responsive. Ease of change and reconfiguration allows me to meet our needs more quickly.”*

*— Connie Bender, Senior Director*

*“We’re committed to responsible practices, and E2 Walls supports our philosophy with products that are 90-100 percent reusable. To us, E2 Walls is not just a service vendor, but a business partner.”*

*— Sue Hometchko, VP, Facilities and Print Operations*

*“I don’t know other companies like E2 Walls, with their level of service and responsiveness.”*

*— Bruce Ludke,  
Manager of Building Maintenance*

Glass walls allow exterior light in while protecting privacy. Cherry veneer panels match the solid wood door.

## Series 225

This 2 1/4" tongue-and-groove unitized panel system is our most cost-efficient solution, designed for any interior.

- 24" wide, 5/8" Type X USG gypsum panels, manufactured at heights up to 12'
- Precision laminated and pre-finished with vinyl, fabric or even custom materials
- Incorporates full-height glass, chair rail, clerestory, glass sidelights, pass-through openings and hinged and sliding doors
- STC rating of 37
- Class A fire rating

## Ultrawall®

For executive or managerial offices and healthcare settings that require greater privacy, the Ultrawall system is the perfect sound barrier. Yet even with its superior performance, the system is both affordable and aesthetically pleasing.

- 24" wide, pre-kerfed, pre-decorated 3/4" Type X USG gypsum panels
- Vinyl finishes and contemporary fabrics accommodate most design requirements
- Incorporates full-height glass, chair rail, clerestory, glass sidelights, pass-through openings and hinged and sliding doors
- STC rating of 42-47
- One-hour fire rating

## Architectural Glass Walls

Architecture and design play an important role in planning a space, and glass walls provide an "open environment" with beautiful aesthetics while controlling sound and privacy.

- 1/4", 3/8" or 1/2" thick tempered glass as specified
- All-aluminum components including hinged or sliding doors, mullions, rails and sills
- Design options include curves, erasable white writing walls, decorative glass and applied films

## Doors & Hardware

E2 Walls sources doors from LEED-certified manufacturers. Choose from hinged or sliding door products in aluminum, hardwood, paint grade or plastic laminate, including pre-finished architectural doors.

- Glass inserts are available
- In-house, enviro-friendly door finishing process
- Door hardware to match building standard or as specified

## Product Planning & Application

Our professional staff will work closely with you to develop a comprehensive plan to get the most out of your workspace and your investment in our wall systems. We'll help you choose wall types, doors, glass and privacy features to meet your needs for offices, conference rooms, training facilities, storage areas and more. Plus, we'll anticipate how our movable wall systems can easily adapt to changes in your future workspace demands; something fixed drywall construction simply can't do.

Using our convex (above) and concave (below) wall designs, we can build in curves without the need for custom fabrication.

## Custom Fabrication

We personally field-measure on site, then custom fabricate wall systems and doors in our 26,000-square-foot facility. If required, CAD drawings will be provided.

## Expert Installation & Service

Our team of certified technicians — averaging more than 20 years experience — ensures that installation is done safely, cleanly and on time. If necessary, we'll work nights and weekends to minimize disruption to your organization.

Our service team stands ready to return to your site to reconfigure your wall system in response to changes in your business. Compared to traditional fixed-drywall construction, you'll continue saving money every time you update your office space. For our regional and national clients with multiple locations, we will travel to any site to install or re-configure our wall systems.

*“If I had space for them, E2 Walls would have an office here. We use them on a monthly basis.”*

— Sue Hometchko,  
VP, Facilities and Print Operations

Our ability to create customized, creative spaces allows us to meet the needs of architects and designers.

*“E2 Walls proves you can get a high-quality product in a short amount of time.”*

— Briehn Wildman,  
Project Manager and Interior Designer

## See how our wall systems can transform your workspace and deliver a very compelling return on investment.

## OUR PROMISE TO OUR CLIENTS

Some of the world's most recognizable brands have built their reputations on simple yet solid foundations. Ray Kroc, the founder of McDonald's, built his business on **QUALITY, SERVICE, CLEANLINESS** and **VALUE**. That foundation worked for McDonald's, and it has worked for us, too, since 1983. When you partner with E2 Walls, we promise to deliver:

- The highest **QUALITY** materials and workmanship
- Unmatched **SERVICE** and attention to every detail
- The highest degree of **CLEANLINESS** in our products and installation processes
- The greatest ongoing **VALUE** for your investment

*Our only goal is to manufacture, install and service the best moveable wall systems in the industry. It's all we do, and we love doing it for you.*

*We look forward to the opportunity to partner with you.*
